Movie Ticket Booking System – Developer Guide

1. User Registration Module

```
1 // Handle registration
2 if (isset($_POST['register'])) {
3     $name = trim($_POST['reg_name']);
4     $email = trim($_POST['reg_email']);
5     $password = $_POST['reg_password'];
6     $confirm = $_POST['reg_confirm'];
7
8     $errors = [];
9
10    // Validation
11    if (empty($name) || !preg_match("/^[a-zA-Z\s]{2,50}$/", $name)) {
12        $errors[] = "Name must be 2-50 letters and spaces only.";
13    }
14    if (!filter_var($email, FILTER_VALIDATE_EMAIL)) {
15        $errors[] = "Invalid email format.";
16    }
17    if (strlen($password) < 6) {
18        $errors[] = "Password must be at least 6 characters.";
19    }
20    if ($password !== $confirm) {
21        $errors[] = "Passwords do not match.";
22    }
23 }
```

- Allows new users to create an account in the system.
- Users must provide basic information such as name, email, and password.
- The system validates user input before registration.
- Passwords must be stored securely using encryption or hashing methods.
- The system ensures that each email address is unique.
- After successful registration, users can access system features.

2. User Login Module

```
1  if (isset($_POST['login'])) {
2      $email = trim($_POST['login_email']);
3      $password = $_POST['login_password'];
4
5      $stmt = $conn->prepare("SELECT id, name, password, role FROM users WHERE email = ?");
6      $stmt->bind_param("s", $email);
7      $stmt->execute();
8      $result = $stmt->get_result();
9      if ($row = $result->fetch_assoc()) {
10         // User found
11         if (password_verify($password, $row['password'])) {
12             $normalizedRole = strtolower(trim((string)$row['role']));
13             $_SESSION['user_id'] = $row['id'];
14             $_SESSION['user_name'] = $row['name'];
15             $_SESSION['user_role'] = $normalizedRole;
16         }
17     }
18 }
```

- Enables registered users to log in to their accounts.
- Users enter their email/username and password.
- The system verifies user credentials with stored data.

- A secure authentication process is implemented.
- After successful login, users gain access to personalized features.
- The system should handle login errors and invalid credentials.

3. Show Time Viewing Module

```

1  <!-- Category filters -->
2  <div class="category-filters">
3    <button class="category-btn active" data-category="all">All</button>
4    <?php
5      // Fetch distinct categories from movies table
6      $cat_result = $conn->query("SELECT DISTINCT category FROM movies WHERE category IS NOT NULL AND category != '' ORDER BY category");
7      while ($cat = $cat_result->fetch_assoc()) {
8        echo '<button class="category-btn" data-category="' . htmlspecialchars($cat['category']) . '">' . htmlspecialchars($cat['category']) . '</button>';
9      }
10     ?>
11   </div>
12

```

```

1  <!-- Showtimes as rounded badges -->
2  <?php if (count($showtimes) > 0): ?>
3    <div class="showtimes-preview">
4      <?php foreach ($showtimes as $st):
5        $time = date('g:i A', strtotime($st['show_time']));
6        $isTonight = ($st['show_date'] == date('Y-m-d') && $currentHour >= 18 && $currentHour < 23);
7        ?>
8        <span class="showtime-pill <?=$isTonight ? 'tonight' : '' ?>"><?=$time ?></span>
9      <?php endforeach; ?>
10   </div>
11 <?php else: ?>
12   <div class="showtimes-preview">
13     <span class="showtime-pill" style="opacity: 0.5;">No shows</span>
14   </div>
15 <?php endif; ?>

```

```

1  <!-- Search Section -->
2  <div class="search-section">
3    <label><i class="fas fa-search"></i> Search Movies</label>
4    <div class="search-wrapper">
5      <i class="fas fa-search search-icon"></i>
6      <input type="text" id="searchInput"
7        placeholder="Type to search by title, genre, category or language..."
8      <i class="fas fa-times-circle clear-search" id="clearSearch"></i>
9    </div>
10   <div class="search-stats" id="searchStats"></div>
11 </div>

```

- Allows users to view available movie showtimes.
- Users can select a preferred date to check movie schedules.
- The system displays movies available on the selected date.

- Users can view different theater locations and show timings.
- Easy navigation is provided to browse different shows.

4. Feedback Module

```
1  $feedback_id = intval($_GET['feedback_id'] ?? 0);
2  if (!$feedback_id) {
3      echo json_encode(['replies' => []]);
4      exit;
5  }
6
7  // Fetch replies for the given feedback
8  $stmt = $conn->prepare("SELECT reply_text, created_at FROM feedback_replies WHERE feedback_id = ? ORDER BY created_at ASC");
9  $stmt->bind_param('i', $feedback_id);
10 $stmt->execute();
11 $result = $stmt->get_result();
12
13 $replies = [];
14 while ($row = $result->fetch_assoc()) {
15     $replies[] = $row;
16 }
17
18 // Return JSON
19 header('Content-Type: application/json');
20 echo json_encode(['replies' => $replies]);
21 ?>
```

- Allows users to write feedbacks for movies.
- Only logged-in users can submit feedbacks.
- Admin has the ability to monitor and manage feedbacks.

- Feedback improve user engagement within the platform.
-

5. Movie Trailers Module

```
1 <div class="movie-card-horizontal">
2   <div class="card-img"
3     style="background-image: url('<?php echo htmlspecialchars($movie['image_url']) ?>');">
4   </div>
5   <div class="card-body">
6     <h3 class="card-title"><?php echo htmlspecialchars($movie['title']) ?></h3>
7     <p class="card-meta"><?php echo htmlspecialchars($movie['category']) ?></p>
8     <div class="card-buttons">
9       <a href="#" class="btn btn-outline btn-small"
10        onclick="playTrailer('<?php echo htmlspecialchars(addslashes($movie['title'])) ?>', '<?php echo htmlspecialchars(addslashes($movie['trailer_url'])) ?>')">Trailer</a>
11       <a href="booking.php?movie_id=<?php echo $movie['id'] ?>"
12        class="btn btn-primary btn-small">Book</a>
13     </div>
14   </div>
15 </div>
```

- Users can watch movie trailers directly within the system.
 - Trailers are embedded from video platforms such as YouTube.
 - Each movie has an associated trailer link.
 - Trailers help users preview movies before watching them.
 - This feature enhances the entertainment experience.
-

6. Admin Dashboard Module

```
1  <!-- Charts Row -->
2      <div class="row g-4 mb-4">
3          <div class="col-lg-8">
4              <div class="card">
5                  <div class="card-header-with-toggle" data-target="revenueSection" data-default-expanded="true">
6                      <h5>Revenue Overview (Last 7 Days)</h5>
7                      <i class="bi bi-chevron-right"></i>
8                  </div>
9                  <div class="toggle-content show" id="revenueSection">
10                     <div style="height:250px;">
11                         <canvas id="revenueChart"></canvas>
12                     </div>
13                 </div>
14             </div>
15         </div>
```

- Provides an administrative control panel.
 - Admin can view system statistics and activities.
 - Admin can manage movies, theaters, and show schedules.
 - Admin can monitor user activities and reviews.
 - The dashboard helps maintain system performance and control.
-

9. Management System Module

```
<!-- Movie Modal (Add/Edit) -->
<div class="modal fade" id="movieModal" tabindex="-1">
  <div class="modal-dialog modal-lg">
    <div class="modal-content">
      <div class="modal-header">
        <h5 class="modal-title" id="modalTitle">Add Movie</h5>
        <button type="button" class="btn-close" data-bs-
dismiss="modal"></button>
      </div>
      <div class="modal-body">
        <form id="movieForm">
          <input type="hidden" name="id" id="movieId">
