- View **showtimes** for each movie.
- Select a **cinema location** for the movie.
- Choose **seats** from an interactive seating layout.
- Book **single or multiple tickets** at once.
- Users select a movie and view available seats.
- The system displays a seat layout.
- Users choose their preferred seats for booking.
- The system reserves seats to prevent double booking.

3. Admin Panel:

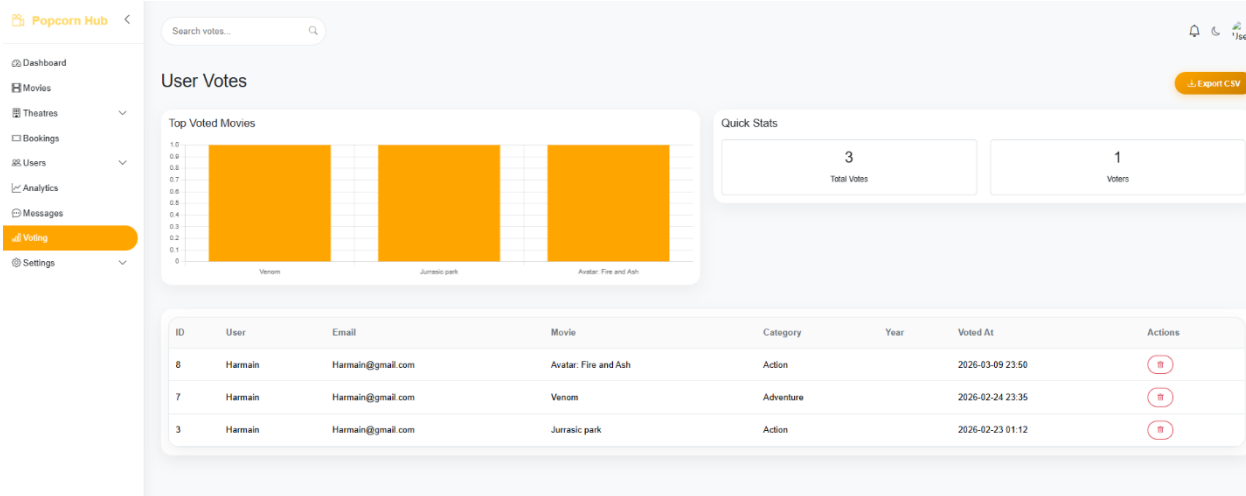

- The admin panel controls the entire system.
- The admin can manage users, movies, bookings, and voting polls.
- The admin dashboard displays important statistics such as total users and bookings.

4. Movie Management:

- The admin can add new movies to the system.
- Showtimes can be assigned to each movie.
- The admin can edit movie details when required.
- The admin can also delete movies from the system.

5. Dynamic Voting System:

- The admin creates voting polls with multiple options.
- Users select their preferred option and submit their vote.
- Votes are stored in the database.
- The system automatically updates the voting results.
- The admin panel displays voting results in tables.
- The admin can monitor total votes and option results.
- An export button allows the admin to download voting data in MS Excel format.

6. QR Code Ticket System:
